THE BEST IN ITS CLASS

NEOPLAN

Time for a special journey. The new Tourliner.

A COACH TO IMPRESS

The new Tourliner is impressive from the first glance. The newest member of the NEOPLAN family impresses with its particularly generous sense of space and outstanding level of travel comfort as well as a new and clever approach to efficiency, comfort and safety. Its outstanding design, state-of-the-art interior and first-class equipment inspire passengers while making them feel right at home.

The new Tourliner perfectly meets our requirement of always offering passengers, drivers and companies the cream of the crop. This vehicle demonstrates that we are fully committed to not only fulfilling wishes but also dreams.

Travelling in its most beautiful form.

SUCCESSFUL SYMBIOSIS BETWEEN DYNAMICS AND DESIGN

Clear and precise contours from the front to the rear panel, perfect aerodynamics as well as fascinating design elements such as the front headlights with black panel and angel eyes – the Tourliner is a real eye-catcher. Wherever your eyes take you, you will discover something new and impressive:

one optical highlight after the other, on both the inside as well as the outside. The new Tourliner impresses down the line and guarantees – as is typical for NEOPLAN – travelling in its most beautiful form.

ELEGANT AND FLEXIBLE

Whether as a premium bus, coach or long-distance coach – the Tourliner is the new highlight on the road.

Get on board and feel at home.

SPECIAL SENSE OF SPACIOUSNESS

The new lighting concept with indirect LED lighting throughout impresses immediately and creates a pure sense of well-being.

UNIQUE COMFORT

User-friendly service sets and optimum climate control with individual ventilation guarantee relaxed travel.

MORE STORAGE

The sophisticated design of the luggage racks is not only a visual highlight, but also means they are more generously sized and easier to access.

BARRIER-FREE MOBILITY

The level, platform-free floor, a wheelchair lift as well as two wheelchair spaces guarantee excellent barrier-free mobility.

COMFORT THAT IS SECOND TO NONE

The fascinating exterior of the Tourliner is continued throughout on the inside. State-of-the-art design, contemporary colours, quality materials and a new lighting concept create a particularly harmonious sense of space, whilst at the same time setting new standards in the field of comfortable travel. Everything is just right. From the first moment you get on board, time and space fuse into a feeling of well-being that is impressive without end and makes us forget the world around us.

Lean back and enjoy.

REDISCOVER INFOTAINMENT

Listen, watch, dream, enjoy and just simply relax. Passengers can enjoy their own personal and individual infotainment experience with the completely new multimedia world on board the Tourliner with everything that this involves – including their own USB charging point and the possibility to play back their own data. With perfected image and sound, every journey in the new Tourliner is an even more relaxing experience.

CONVENIENT FULL CHARGING

The comfortable seats provide each passenger with their own USB charging point.

INDIVIDUAL ENTERTAINMENT

The latest generation of the Multimedia Coach infotainment system is particularly user friendly and also enables you to play back your own data via USB or SD card.

Driving pleasure
down the line.

AN IMPRESSIVE WORKPLACE

The Tourliner's generous and high-quality driver's workplace provides plenty of freedom of movement as well as enough storage space for all the essentials. Ergonomic seats, a visual as well as haptic high-quality multi-function steering wheel, as well as optimally placed devices and switches which are easy to operate, make the driver's work easier and ensure added safety. In short: not only your passengers, but also your drivers will be impressed by the particular advantages of the Tourliner.

Inner values count too.

TECHNOLOGY AT THE HIGHEST LEVEL

The Tourliner also stands out with its inner values. With sophisticated and tried-and-tested technology on board, it is powerful and yet still highly economical. Just as you would expect from NEOPLAN, the class leader is equipped with all refinements and meets the highest standards in terms of safety and economy.

MODEL ECONOMY

The Tourliner scores down the line in terms of lifecycle costs. In comparison with the predecessor model, it uses a good 10% less fuel. The maintenance and repair costs have also been considerably reduced through changes to the vehicle body.

PIONEERING SAFETY

With state-of-the-art driver assistance systems and a reinforced skeleton, the Tourliner provides the highest level of safety in every situation. It also meets the ECE-R.66.02 strength of superstructures regulation which will come into force from the end of 2017.

SYSTEMS THAT STAND FOR SAFETY

| | |
|---|--|
| ACC | Adaptive Cruise Control |
| ASR | Anti-Slip Regulator |
| BA | Brake Assistant |
| CDS | Comfort Drive Suspension (electronically controlled suspension) |
